

The Wax Effect

1. Choose 3 different coloured felt pens. On an A5 sheet, draw 10 large dots in different colours.

2. Draw a thicker circle, using a different coloured felt pen around each dot already drawn.

3. Now draw a third circle using your third coloured felt pen. Your circles should touch each other.

4. Using a fine black felt pen, trace around the contour of each shape.

5. With a black pen, draw this graphic design in the interior of the circles.

5. Using a black felt pen, draw tiny circles in the white spaces. Leave the interior of these circles
